

# AXIOM CLOUD

## Business Benefits of Enterprise Performance Management in the Cloud

**Axiom™ Cloud** is the most secure, convenient, and cost-effective deployment for Syntellis' Axiom solutions. Here's how the Axiom Cloud outperforms on-premise implementations in scalability, integration, performance, security, and compliance.

### Minimal IT Footprint

Get up and running on a modern Enterprise Performance Management platform without new hardware and extensive support from your IT team.

### Governance and Compliance

Axiom Cloud complies with industry regulations such as HIPAA, SOX, GLB, and SSAE 18 SOC 2 with full audit trail tracking of operational controls and reporting.

### Powerful Automated Data Integration

Import from virtually any financial, operational, or third-party GL data source. Imports are scheduled for full automation — no manual data uploads are necessary.

### Seamless Updates

Platform updates are applied according to your schedule. Updates provide access to new capabilities, with no disruption or rebuilding of existing reports.

### Connect from Anywhere

Connect to Axiom via an internet connection anywhere in the world.

### Unmatched Security

Axiom Cloud's robust security model offers complete control of the most granular elements of system access for each user or role. Comprehensive auditing capabilities are a core feature in the SOC 2-compliant platform.

### Perform with Confidence

99.95% average uptime and a highly resilient disaster recovery plan for your Axiom system.

### Training and Development Environment

Use the optional sandbox to test new features and implement new ideas before promoting them to your production environment.

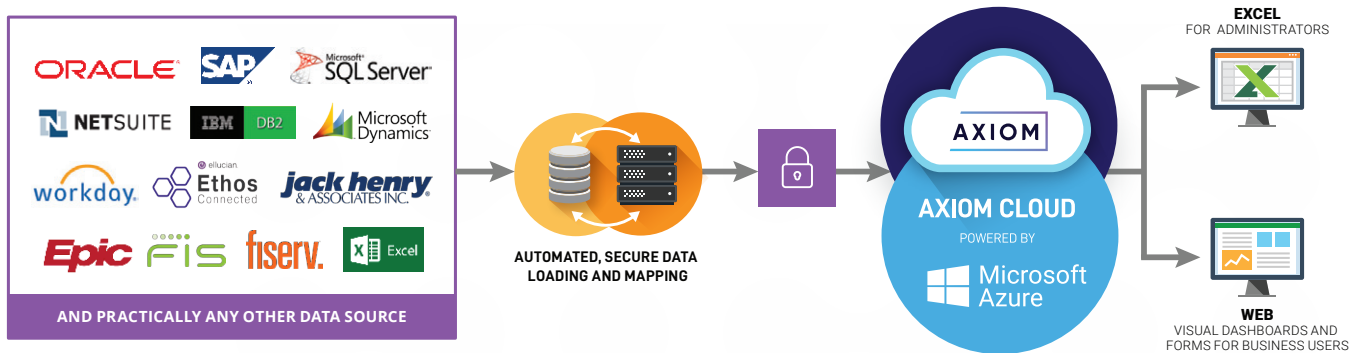

### Scale as Needed

Axiom Cloud can support any number of users, any number of processes, and large data sets.

Axiom Cloud reduces IT overhead and delivers optimal system performance and unmatched security. Syntellis provides and maintains all necessary platform infrastructure and performs all technical maintenance activities. You connect to your own personalized Axiom system via a secure internet connection.

Unlike many cloud offerings, Axiom Cloud is a truly unified performance management platform that delivers solutions for budgeting & forecasting, reporting & analytics, strategy management, capital planning, and profitability & cost management on a single integrated platform. You can take advantage of the benefits of cloud computing without sacrificing the need for unmatched modeling flexibility, enterprise performance, and security.

## Technical Architecture:

- Supported by the world's largest multi-terabit global network
- Dedicated encrypted data storage
- SSAE 18 infrastructure compliance certification
- Secure SSO via LDAP, Active Directory, or SAML
- 256-bit TLS 1.2 SSL encryption
- 99.95% average uptime
- Seamlessly scalable as new users and features are added
